

# Alarm Management

Adroit Alarm Management is a reporting tool that allows you to measure and report against world-class alarming standards and guidelines, leading to higher efficiency and safety.

# Introduction

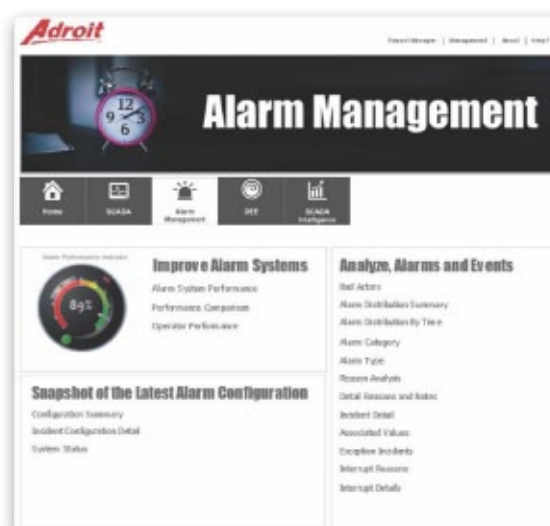

Adroit Alarm Management is a reporting tool that allows you to measure and report against world-class alarming standards and guidelines, leading to higher efficiency and safety.

The reports available in Adroit Alarm Management provide the tools necessary for alarm system performance measurement and improvement, providing valuable insight into the alarm system.

These reports include an alarm system performance dashboard and a system performance comparison report supporting continuous improvement initiatives.

With Adroit Alarm Management and Analysis, the maintenance costs will be reduced and the performance of the plant drastically improved.

## Key Features and Benefits

Providing Valuable Information on the Alarm System

# Alarm Analysis Report

## Bad Actors Reports

Alarms that, if not dealt with, cause system degradation. These alarms appear often and eliminating issues can improve performance.

## Incident Detail Report

Highlights incidents distribution (per hour) over the selected period for the selected incidents.

## Alarm Type Report

Summarises incidents for the use-selected type.

## Reasons & Notes Analysis Report

Highlights the prevalent reasons, sub-reasons and notes assigned to incidents.

## Associated Values Report

Provides a detailed list of configured associated value per incident.

### Detail Reasons & Notes Report

Highlights the prevalent reasons, sub-reasons and notes assigned to incidents.

## Alarm Category Report

Summarises incidents for the use-selected category.

## Exception Incidents Reports

Displays detailed alarm information for state incidents, unacknowledged incidents or incidents without outstanding reasons and notes.

## Operator Performance Report

Measures operator acknowledgment durations.
